

Name and date

Make the **tallest** tower you can out of marshmallows and spaghetti. Or... make the **weirdest** tower you can out of marshmallows and spaghetti.

This task requires:

- teamwork,
- patience,
- the ability not to break the spaghetti and
- the ability not to eat the marshmallows (until the end).

Top tips

- Triangles are stronger than squares.
- Pyramids are a nice strong shape.
- Doubling up the spaghetti is a good idea as it makes the tower stronger.

GOOD LUCK!
